

## 2012 Pool Filter Upgrade

The Daniel Healy Pool was built in 1978. After many hot summers, the Exeter Parks and Recreation department will continue to breath new life into the facility with an upgrade of the 38 year old filter system. The filter system is the original system which is so big the building was built around it. The new system will be smaller and faster allowing the space to be better utilized as well as turning over the water more often. The work being done on this project is Northern Pool from Eliot, Maine. All cost associated with this upgrade will be paid out of the Recreation revolving fund.

Exeter Parks and Recreation continues to look for ways to upgrade this facility to make it more comfortable for the patrons.
